

ATS RENEW: The 2003 Clinical State of the Art Course

CME Post
Test included
for Category
1 credit

American Thoracic Society Preeminent Review Course in Pulmonary and Critical Care Medicine

February 27-March 2, 2003

San Juan, Puerto Rico

CD Content Summary

This course provides a perspective of practical importance on the management of pulmonary and critical care disorders. The CD-ROM contains lectures and a post test for 13 Category 1 CME credit.

Multimedia Format

This hybrid CD-ROM, compatible with both Windows and Macintosh environments, replicates the experience of attending the meeting in person. The disc will contain audio and the slides for each presentation. Users may start anywhere within a presentation, pause, reverse, fast forward, or exit and locate a different presentation by searching via subject, keyword, title or author.

Jamie Hey

Course Objectives

Upon completion of this course, participants will be able to:

(1) Apply up-to-date information and evidence-based advice to the clinical management of clinical problems in pulmonary medicine and respiratory intensive care.

(2) Discuss the essential elements of lectures designed to provide an expert synthesis on "what's new" in selected topics across a spectrum of pulmonary and critical care medicine.

(3) Interpret the succinct viewpoints on specific topics provided by Meet the Professor seminars through an extended opportunity for informational interaction with lecturers.
